Crash Statistics and Ranking Priorities

Traffic Safety and Crash Analysis

Crash Analysis Methodology

Crash location priority rankings for intersections were developed using a variety of summary statistics, including traffic volumes, overall severity of crashes, and facility type. The inclusion of these components helps ensure that moneys earmarked for spot safety improvements are spent in the most efficient and cost-effective manner. The following tables provide the scoring criteria for the rankings of intersection analyses. The overall scoring for each intersection follows.

Measure 1 - Vehicles Entering (Per Day)	
26,102+	10
25,701 - 26,101	9
24,162 - 25,700	8

[A] Vehicles entering is based on average daily traffic volumes provided by NCDOT

[B] Total crashes provided by NCDOT, for the period between January 1, 2004 and December 31, 2006

[C] EPDO Rate is based on the following formula: EPDO Rate = 76.8*(Fatal Crashes +Type A Injury Crashes) + 8.4*(Type B Injury Crashes + Type C Injury Crashes) + Property Damage Crashes

[D] Crash Rate is based on the following formula: Crash Rate = (Total crashes*1,000,000)/(AADT*365 days per year*3 year analysis period); reported as crashes per million vehicles entering (MVE)

Connectivity is not a good idea. Small neighborhoods w/ family watch programs are turning small towns. Children can't ride their bikes anymore! "If it ain't broke don't fix it" The roads in the neighborhoods are way too narrow to keep connecting (new) neighborhoods and cats more traffic to them.

15) General comments:

All attempts should be made to keep traffic out of neighborhoods by improving traffic flows on main roads so that small communities can remain pedestrian friendly and neighbours can remain safe and in touch with one another.

3) Do you work within the Town?
- ☐ Yes
- ☒ No

4) What do you LIKE most about the Town of Mint Hill?

The small town atmosphere, open land, pastures + farms, ~~neighbors~~ schools (local) churches, heritage, the local flavor of the town that makes Mint Hill unique.

5) What do you DISLIKE most about the Town of Mint Hill?

The "too" rapid growth, increase in traffic, big developers overrunning the town & surrounding areas - the fear of becoming another Pineville

6) How would you rate the following in the Town of Mint Hill? *(check one)*

	Excellent	Good	Fair	Poor
Condition of Roads	☐	☒	☒	☐
Traffic Congestion	☐	☐	☒	☒
Attractiveness of Roads	☐	☒	☒	☐
Traffic Safety	☐	☒	☒	☐
Walking Environment (i.e., sidewalks)	☐	☐	☒	☐
Bicycling Environment	☐	☐	☒	☐
Signal System (i.e., traffic lights)	☐	☐	☒	☐

Comments:

The road system & schools CAN not keep up with the developers / development

Cut thru traffic in neighborhoods is increasingly adding to the dissolution of neighborhoods & adding dangerous conditions for walking, bicycling and children playing. This is not what Mint Hill is supposed to be like - it should be a safe, community oriented small town that respects its citizens and neighborhoods.

7) Overall, how would you rate your travel experiences in the Mint Hill area?
- ☐ Excellent
- ☒ Good
- ☒ Fair
- ☐ Poor

8) Name any specific areas of Mint Hill that you avoid traveling due to concerns about traffic congestion.

* Lebanon Rd. at Hwy 51 * Hwy 51 at Idlewild, Exiting from Old M.T. downtown at Shomars and Burger King, Food Lion at Hwy 51 - you can't get out into traffic, Charter School traffic on Hwy 51

9) What specific changes would you recommend to improve the qualtiy of transporation in the Mint Hill area?

Stop lights & Turn signals at Lebanon Rd & Hwy 51 - Reconfigure Hwy 51 turn lanes in front of Food Lion Shopping Center - The turn lanes are too short - confusion w/ double lines & turn lanes

Note: When the shopping center at Costco, Michael's etc was built a traffic light was erected behind Michaels there may be 5 cars stopped at a time, at Lebanon Rd 50-75 cars or more can pass on Hwy 51 before you can pull out - Why did the Shopping center get a light & we can't get one at Lebanon Rd.

10) If you had an infinite amount of money to spend on transportation, designate what percentage you would allocate to the following improvements. Note your total should equal 100%.

Neighborhood traffic calming (4-way stop, speed humps, and raised crosswalks)	5 %
Sidewalk construction and repairs	____ %

15) General comments: We are a small southern town with a history dating from the 1700's - preserve this please!! I am distressed that downtown Mint Hill is being destroyed to become just like everywhere "small" town. The beautiful trees are falling and trendy buildings are rising - these look just like all of the other buildings in "everywhere USA". The destruction of the trees at the physicians building across from Lowe's Foods shopping center is tragic. The trees that were cut down at the new storage building on Hwy 51 (Morris Park) have been replaced by new trees at the same site - Why? I know progress must happen - When does PROGRESS MEAN DESTR

PLEASE - NO more TANNING Salons, NAIL SALONS Pizza Take outs & Chinese Restaurants instead to add to what we already have - Get some industry
